I dock manually and only use one dock and one monitor i love ubuntu but i have a problem with the dock. I can put it on any side but it always stay right side. and if i hit to the bottom it will automaticaly go to the top. i guess this has something to do with compiz lixan: I don't use an external dock, I just use a dock I built myself from scratch. When I ask to mount it, it gives this error: mount.nfs4: mount(2): Operation not supported maybe its a bug lixan: what are you talking about a "external dock"? lol !pm | blackface blackface: Please ask your questions in the channel so that other people can help you, benefit from your questions and answers, and ensure that you're not getting bad advice. i mean that i install windows and it didnt touch the ubuntu dock 82157476af
